

Prime Stack Test Case Design

Team: Prime Stack
Application under test: Frost Inventory and Shopping System
Report date: 14 May 2026

1. Purpose

This document defines the planned test cases for the Frost Inventory and Shopping System. It includes functional, frontend/usability, performance, and security tests, with traceability to the test objectives in the test plan.

2. Functional Test Cases

ID	Feature	Type	Preconditions	Steps	Expected result
TC-FUNC-001	User registration	Normal	Test email does not exist	POST <code>/User/register</code> with valid username, email, password	Status <code>201</code> , success message, safe user object returned
TC-FUNC-002	User registration	Missing data	None	POST <code>/User/register</code> without email	Status <code>400</code> , registration rejected
TC-FUNC-003	User registration	Missing data	None	POST <code>/User/register</code> without password	Status <code>400</code> , registration rejected
TC-FUNC-004	User registration	Missing data	None	POST <code>/User/register</code> without username	Status <code>400</code> , registration rejected
TC-FUNC-005	User registration	Duplicate	User already exists	POST <code>/User/register</code> with duplicate email	Status <code>409</code> , duplicate rejected
TC-FUNC-006	User registration	Boundary	None	POST username shorter than 3 characters	Status <code>400</code> , username rejected
TC-FUNC-007	User registration	Boundary	None	POST password shorter than 6 characters	Status <code>400</code> , password rejected
TC-FUNC-008	User registration	Invalid format	None	POST invalid email format	Status <code>400</code> , email rejected
TC-FUNC-009	Login	Normal	Login user exists	POST <code>/User/login</code> with correct credentials	Status <code>200</code> , login success message
TC-FUNC-010	Login	Error	Login user exists	POST <code>/User/login</code> with wrong password	Should return <code>401</code> ; defect DEF-005 records current <code>500</code> handling
TC-FUNC-011	Login	Error	None	POST <code>/User/login</code> with non-existent username	Should return <code>401</code> ; defect DEF-005 records current <code>500</code> handling
TC-FUNC-012	Login	Missing data	None	POST <code>/User/login</code> with empty body	Should return <code>400</code> ; defect DEF-005 records current <code>500</code> handling
TC-FUNC-013	Authentication status	Normal	No active session	GET <code>/User/status</code>	Status <code>200</code> , <code>isAuthenticated=false</code>

ID	Feature	Type	Preconditions	Steps	Expected result
TC-FUNC-014	Product list	Normal	Products exist or empty table allowed	GET <code>/Product/</code>	Status <code>200</code> , array returned
TC-FUNC-015	Product details	Normal	Products/suppliers may exist	GET <code>/Product/getALL</code>	Status <code>200</code> , array returned
TC-FUNC-016	Product creation	Normal	Supplier id exists	POST <code>/Product/</code> with valid product	Status <code>200</code> , product created
TC-FUNC-017	Product creation	Duplicate	Product name already exists	POST duplicate product name	Status <code>409</code> , duplicate rejected
TC-FUNC-018	Product lookup	Normal	Product exists	GET <code>/Product/getByProductId/:id</code>	Status <code>200</code> , product returned
TC-FUNC-019	Product lookup	Error	Product id does not exist	GET <code>/Product/getByProductId/999999</code>	Status <code>404</code> , product not found
TC-FUNC-020	Product stock	Normal	Product exists	PUT <code>/Product/decreaseAmount/:id</code> with amount	Status <code>200</code> , amount updated
TC-FUNC-021	Product deletion	Normal	Product exists	DELETE <code>/Product/:id</code>	Status <code>200</code> , product deleted
TC-FUNC-022	Supplier list	Normal	None	GET <code>/Supplier/</code>	Status <code>200</code> , array returned
TC-FUNC-023	Supplier creation	Normal	Supplier name does not exist	POST <code>/Supplier/</code> with name/contact	Status <code>200</code> , supplier created
TC-FUNC-024	Supplier creation	Duplicate	Supplier name already exists	POST duplicate supplier name	Status <code>409</code> , duplicate rejected
TC-FUNC-025	Supplier lookup	Normal	Supplier exists	GET <code>/Supplier/:id</code>	Status <code>200</code> , supplier returned
TC-FUNC-026	Supplier lookup	Edge	Supplier does not exist	GET <code>/Supplier/999999</code>	Status <code>200</code> , body is <code>null</code>
TC-FUNC-027	Supplier update	Normal	Supplier exists	PUT <code>/Supplier/</code> with updated name/contact	Status <code>200</code> , supplier updated
TC-FUNC-028	Supplier deletion	Normal	Supplier exists	DELETE <code>/Supplier/:id</code>	Status <code>200</code> , supplier deleted
TC-FUNC-029	Purchase list	Normal	None	GET <code>/Purchase/getAll</code>	Status <code>200</code> , array returned
TC-FUNC-030	Purchase creation	Normal	Existing user and product	POST <code>/Purchase/create</code> with products array	Status <code>201</code> , purchase and purchased products returned
TC-FUNC-031	Purchase creation	Missing data	None	POST <code>/Purchase/create</code> with empty body	Request rejected; current implementation returns <code>500</code>
TC-FUNC-032	Purchase by user	Normal	User exists	GET <code>/Purchase/byUserId/:userId</code>	Status <code>200</code> , array returned
TC-FUNC-033	Purchase sorting	Normal	User exists	GET <code>/Purchase/byUserInAsc/:userId</code>	Status <code>200</code> , array returned in ascending order
TC-FUNC-034	Purchase sorting	Normal	User exists	GET <code>/Purchase/byUserInDesc/:userId</code>	Status <code>200</code> , array returned in descending order
TC-FUNC-035	Purchased products	Normal	Purchase exists	GET <code>/Purchase/byPurchase/:purchaseId</code>	Status <code>200</code> , array returned

ID	Feature	Type	Preconditions	Steps	Expected result
TC-FUNC-036	Purchase order parameter	Edge	User exists	GET /Purchase/byUserId/:userId?order=invalid	Status 400 , invalid order rejected

3. Frontend and Usability Test Cases

ID	Area	Steps	Expected result
UT-001	Registration and login usability	Open the Angular app, navigate to login/register, fill registration fields, capture screenshots	User can complete the registration/login preparation flow and screenshots are saved
UT-002	Product browsing usability	Open the Angular app and navigate to the client product/dashboard page	Product browsing page loads and screenshots are saved
UT-003	Existing user login usability	Open login page, fill existing credentials, submit login, capture final screen	Login flow reaches a valid post-login page and screenshots are saved

4. Performance Test Cases

ID	Endpoint / workflow	Load condition	Expected result
PT-001	GET /User/status	5 to 50 virtual users	Status 200 , response under 200 ms for individual check
PT-002	GET /Product/	5 to 50 virtual users	Status 200 , response under 300 ms for individual check
PT-003	GET /Product/getALL	5 to 50 virtual users	Status 200 , response under 400 ms for individual check
PT-004	GET /Supplier/	5 to 50 virtual users	Status 200 , response under 300 ms for individual check
PT-005	POST /User/login	5 to 50 virtual users	Status 200 , response under 500 ms for individual check
PT-006	Overall API	Ramp 5 VUs for 30s, 20 VUs for 1m, 50 VUs for 30s, ramp down 30s	95th percentile response time below 500 ms and error rate below 10%

5. Security Test Cases

ID	Risk area	Attack / input	Expected result
ST-001	SQL injection login	Username/password: ' OR '1'='1	Login rejected, no user data returned
ST-002	SQL injection URL parameter	/Product/getByProductId/1' OR '1'='1	Request rejected or sanitized; database contents not exposed
ST-003	XSS registration	Username: <script>alert("xss")</script>	Input should be sanitized or rejected; defect DEF-008 records current storage risk
ST-004	Broken access control	GET /User/profile without session	Status 401

ID	Risk area	Attack / input	Expected result
ST-005	Mass assignment	Register body includes <code>role: "admin"</code>	User should not be granted admin role; defect DEF-006 records critical risk
ST-006	Oversized payload	100,000-character username/password	Server does not crash
ST-007	Unauthorized data access	GET <code>/User/users</code> without session	Should return <code>401</code> ; defect DEF-007 records current exposure
ST-008	Security headers	ZAP scan of <code>http://localhost:3000/Product/</code>	<code>X-Content-Type-Options: nosniff</code> should be present; covered by DEF-009
ST-009	Information disclosure	ZAP scan of missing route such as <code>/robots.txt</code>	<code>X-Powered-By</code> should be suppressed; covered by DEF-009
ST-010	CSP configuration	ZAP scan of missing route such as <code>/robots.txt</code>	CSP should define no-fallback directives such as <code>frame-ancestors</code> and <code>form-action</code> ; covered by DEF-009

6. Traceability Matrix

Requirement / objective	Test cases
User authentication works and validates input	TC-FUNC-001 to TC-FUNC-013, UT-001, UT-003, ST-001, ST-004
Product inventory can be managed	TC-FUNC-014 to TC-FUNC-021, UT-002
Suppliers can be managed	TC-FUNC-022 to TC-FUNC-028
Purchases and cart actions work	TC-FUNC-029 to TC-FUNC-036
Application responds under load	PT-001 to PT-006
Security risks are identified	ST-001 to ST-010
